## FREECLIMBER STM-9-5260-8FC-LCD

- The FreeClimber™ step design includes added cushion and independent pedal geometry, with four-bar linkage to create a fluid, natural stepping motion.
- Electronically controlled alternator with chain drive precisely controls the pedal descent allowing a wide range of users to exercise smoothly within their comfort zones.
- Patented, independent pedal geometry with four-bar linkage keeps pedals level ensuring a safe, biomechanically correct movement.
- Embedded OpenHub™ consoles let you climb over a dozen of the world's most recognizable landmarks.

Available with a variety of OpenHub™ Console Options

Media shelf, cupholders, heart rate grips and ergonomic handrail design
