EXPECT INNOVATION ▶

Octane Fitness has redefined seated exercise with the unparalleled xRide recumbent elliptical. With a proud history of continual breakthroughs, our passion is to create innovative fitness equipment that delivers superior workouts and exceptional performance to fuel the lives of every exerciser – including beginners, athletes and those in physical therapy or rehab.

◀ CUSTOMIZED COMFORT

The Active Seat Position™ custom-fits exercisers with multiple height and tilt adjustments that open the torso and maximize use of the hip muscles. The wide cushioned seat, supportive backrest, MultiGrip handlebars and oversized soft grip pedals comfortably position users for optimal performance in leisurely or vigorous workouts.

◀ CLASSIC CONSOLE

With its simple console design, the xR6 Classic displays all essential workout data without the extra

Use the Workout Boosters on the xR6 Classic console to turn it into your own personal trainer. Whether you want to work your upper-body, lower-body or your whole body, the Chest Press, Leg Press and Muscle Endurance programs are specifically designed to provide variety, motivation and results.

xRide®

HIGHLY EFFECTIVE WORKOUT YOU CAN GET SITTING DOWN

Octane® FITNESS

LOWER-BODY MOTION ▲

Thanks to unique PowerStroke pedal motion on the xRide, you benefit from full leg extension and maximum range of motion, which can activate more muscles and burn max calories.

Also, by varying your foot position on the oversized pedals – such as pushing with only the balls of the feet or the heels – you can change how the muscles are engaged. Point toes out to activate the inner thighs, point toes inward to activate the outer thighs.

◀ UPPER-BODY WORKOUT

The patented MultiGrip handlebars enable users to target different muscles using various grips, emphasize pushing or pulling motions or even challenge themselves by using only one arm at a time. Plus, exercisers can periodically isolate the upper body by taking the legs out of the action using the stationary foot pegs.
